Subject: Proposed Microsoft settlement

You must punish Microsoft for monopolistic practices. If Microsoft gets away with such practices then what about other companies, say Standard Oil! Some point to Microsoft and praise what the company has done for computing in America. I, and many others, point to Microsoft and ask what has the company done for computing in America? The answer is nothing that company has not copied, plagiarized, or stolen. The bad behavior must stop now. You must stop it here.
